Paul E. Belanger is a 1981 Ph.D. geology graduate of Brown University and B.S. in Geology from the University of Washington. I have a research background in microfossils and stable isotope geochemistry for understanding past climates and oceanography – thus referred to as paleoceanography and paleoclimatology. I then pursued a National Academy of Sciences post-doctoral fellowship at the USGS in Woods Hole, MA. My CV can be found at <https://denverclimatestudygroup.com/wp-content/uploads/2014/07/Belanger-CV-2014.pdf>.

Twelve years ago, at the behest of the Rocky Mountain Association of Geologist along with Genevieve Young, we started the Denver Climate Study Group Forum 12 years ago along with the associated web page <https://denverclimatestudygroup.com/> After a couple years the forum meetings stopped but continues as a yahoo listserv group of the same name. In the meantime the web page development refocused on other climate related issues as it exists today.

In 2015 David got to know of my work and invited me as a forum speaker for the Ethics and Ecological Economics forum that started the year earlier at ILIFF. I continue to be a member of that forum and built the archival collection of past talks now incorporated into this web site. David Takahashi is in transition to take over these web page updates.

For more information about me go to the “about” tab of the web page I maintain, <https://denverclimatestudygroup.com/>, you will see that I’ve been involved in helping geologists and the public understand the issues of climate change for the past 12 years. The web page morphed in time to focus on

- OLLI courses I taught the past 6 years https://denverclimatestudygroup.com/?page_id=24
- BIOCHAR https://denverclimatestudygroup.com/?page_id=28
- Ethics and Ecological Economics Forum <https://eeeforum.org/>
- And other ancillary tabs/pages.

I’ve been on the board of New Energy Colorado <https://www.newenergycolorado.com/>
I’ve taken MOOC courses:

- John Cook’s Skeptical Science Denial 101x <https://www.edx.org/course/making-sense-of-climate-science-denial>
- And John Leighton’s future learn climate change course <https://www.futurelearn.com/courses/collections/climate-change>

Additionally I maintain a Facebook blog of the same name - <https://www.facebook.com/denverclimatestudygroup/>.

I can be reached at **2276 Mariner Beach Dr., Oak Harbor, WA 98277**
